

# Frontend Web Development

## Assessment

### OBJECTIVE:

For this assessment, you'll have to replicate this [web application design](#). The website you will be developing is going to be **static**.

### NOTE:

- You can either use **React** or just plain **Javascript**.
- You can use this [font](#) or else you can use an other font that you prefer.
- You are not expected to use the same background image as it is on the left side.
- You can use the icons that are available [here](#).
- The chart does not have to look the same as it is. Please use static data for chart representation.
- You can use this [chrome extension](#) to pick colors from any website. Use this to get the color codes for the respective components.

Once you have developed the website, Please upload the source code to a GitHub repository, host it on [GitHub Pages](#) or some other cloud platform that you prefer and fill out this [google form](#) to confirm the assignment submission. Good luck!
